

Request for Dimensions

The dimensions indicated above are necessary for conducting preliminary design work and pricing for all WorkFurniture and Armature system beyond the basic RDS kit (Phase I)

Please provide photo and dimensions of anything that may be in the way of the Armature

The Armature will basically wrap the existing beams and provide turndowns at the outer walls

Please, also, locate all existing outlets and switches on a copy of the existing floor plan with their height (to the center line of the box) above floor

Also provide the location of all existing lighting fixtures with a picture of each type and notation of power output

This information will allow us to get started and provide a schematic layout with preliminary cost estimates
